

NEW FACE OF DIGITAL WEALTH

The new measure of wealth is time but one thing we understand is peace of mind makes the time you spend even better, The digital blockchain revolution has made a huge impact disrupting many long standing industries. We have discovered a cloud based solution that may be the game changer the asset management world has been waiting for.

IMAGINE...

Something new

Imagine being able to view your equities with automatic price updates, all of your cash balances across all bank accounts, monitor your real estate projects and approve stage payments for construction work, all of your art and other collectibles and instantly access any document or photograph. Now layer upon this, the ability to receive automatic alerts about insurance policies lapsing in a timely fashion, being able to allocate assets to family members in conjunction with your will and trust documents (also held on the platform), being able to assess the sustainability score for your portfolio, being able to determine future cash liabilities and tax liabilities including inheritance tax. For wealth owners, this is the dream.

TRADITIONS DEFINE, INTELLIGENCE REFINES

A typical wealth owner with a professional management setup owns on average 5,000 assets, across 30 asset classes over 15 locations globally. These assets are hard to manage, and onerous to track. Portfolios are highly diversified and assets globally distributed.

Monitoring illiquid investments including holiday homes, yachts, wine and artwork is particularly challenging. It can be difficult to assess risk. It is impossible to have an accurate view of valuation and risk without continuous live evaluation of relevant data.

The truth is, portfolios are becoming increasingly diversified and assets globally distributed, monitoring illiquid investments such as holiday homes, yachts, wine and artwork is becoming particularly challenging and without continuous live evaluation of relevant data, it is near impossible to have an accurate view of valuation and risk.

HOLE IN ONE

For an all-in-one collaborative analysis of your data, that arms you with the right information, provides you with full access to your complete portfolio and assists you in making informed decisions, the 1fs Digital Wealth Intelligence platform offers an intelligent solution.

The traditions of asset management and wealth preservation date back hundreds of years, so one could be justified in asking “why change the habits of a lifetime?” It’s simple, ask yourself whether Gen Z are ready to take over the family office?

If the prospect of this has you feeling somewhat anxious or secretly tapping your fingers on your battle-hardened office desk, then the 1fs Digital Wealth Intelligence platform is one you cannot afford to ignore.

Whether it's targeted client customisation, access to wealth intelligence, award winning coverage of mainstream and newer asset classes including crypto and NFTs, in-built family heritage database for seamless succession planning, best in class cloud security and data encryption at all levels with enterprise grade secure data transmissions and multi-factor authentication or oversight of your philanthropic portfolio while tracking your impact, 1fs Wealth has you covered.

99 PROBLEMS

In a financial market riddled with uncertainty, change, bulls and bears, you may have 99 problems but with 1fs Wealth, asset management need not be one.

WEALTH UNVEILED

High-Net-Worth Lifestyles in Africa, UAE, and Asia

In the glittering landscapes of Africa, the opulent skylines of the UAE, and the bustling metropolises

of Asia, a secret world of luxury unveils itself to those in the know.

As we delve into the lives of high-net-worth individuals (HNWIs) across these regions, we discover a tapestry of success, innovation, and a lifestyle that transcends boundaries.

Africa | A Continent of Untapped Opulence

Africa, often underestimated in the global luxury scene, stands as a treasure trove for those seeking exclusive experiences. From private wildlife safaris in the heart of the Serengeti to secluded beachfront villas along the shores of the Seychelles, HNWIs are redefining luxury by embracing the continent's rich diversity.

UAE | Where Extravagance Meets Innovation

In the heart of the Middle East, the United Arab Emirates stands as a symbol of affluence and modernity. Exclusive skyscraper penthouses with panoramic views of Dubai's skyline, private islands in Abu Dhabi, and the thrill of supercar racing on the Yas Marina Circuit - the UAE is the epitome of luxury living.

Asia | Economic Powerhouses and Cultural Extravagance

From the bustling streets of Tokyo to the serene landscapes of Bali, Asia is a continent where economic prowess intersects with centuries-old traditions. High-Net-Worth Individuals in Asia navigate a world where private art collections meet cutting-edge technology, creating a lifestyle that seamlessly blends the past and the future.

The Rise of the Philanthropic Elite

Beyond the material trappings, today's HNWLs are increasingly becoming global citizens with a strong sense of social responsibility. Discover how philanthropy and impact investing are shaping the narratives of wealth in these regions, creating a legacy that goes beyond luxury.

High net worth lifestyles in Africa, the UAE, and Asia exhibit diverse patterns shaped by unique economic landscapes, cultural influences, and geopolitical factors.

While Africa demonstrates potential growth in wealth accumulation, the UAE epitomizes opulence with its thriving luxury sector and dynamic business environment. Meanwhile, Asia, home to diverse economies, showcases a spectrum of high net worth lifestyles, from traditional wealth preservation to innovative ventures.

Despite regional disparities, the common thread is the evolving nature of high net worth lifestyles, reflecting the interchange of tradition and modernity in the pursuit of prosperity.

THE DEAL ROOM

The Deal Room grants exclusive access to a powerful network of affluent, visionary entrepreneurs, investors, and industry leaders. Here, transactions unfold with confidence and ease, backed by a foundation of integrity, high standards, and genuine opportunities. This is where the elite come to thrive, knowing they're among the best in the business.

THE FREQUENCY REVOLUTION

“Balance is not something you find, it’s something you create” quoted by famous author Jana Kingsford and we would have to say we agree. Close your eyes for a moment, sit back and think of the last time you went for an unplanned walk in nature, an impromptu lunch with a friend or a long drive on the open road, windows down and sun beaming down on your skin. After which, you sigh deeply and upon exhaling you find yourself saying the words “ah, I needed that”.

More often than not, our bodies know exactly what we require long before we have consciously processed some of our most basic needs such as the need to relax, unwind, re-charge or perhaps even focus.

Ask yourself, how many moments of “I needed that” have you had over the last 12 months, and how many of those moments did you treat yourself to?

“I NEEDED THAT”

[NexQuest Video](#)

ENHANCE YOUR EVERYDAY LIFE

Between juggling family, kids, business, staying healthy, socialising and fitting in a healthy dose of R&R, it can be difficult to find the time to put yourself first and create moments of balance just for you.

Well, fortunately in the North East of the United States is one very special company who is helping people all over the world do just that.

NexQuest Life Sciences founded by CEO Isaac Mishan, is an innovative company bringing exciting possibilities and opportunities to the wellness and therapeutics space, using their clinically proven Natural Frequency Technology® without the use of chemicals.

ISAAC MISHAN - CEO NEXQUEST

Embarking on his own personal journey of health and wellness, Isaac was led down a road of Western Medicine and solutions that at times created more problems than not. “Almost every time I used Western Medicine solutions I found them to only temporarily cause relief, like putting a band aid on. The underlying issue was never fully addressed, and there were unwanted side effects as well.”

Passionate about finding a better way and a more holistic approach to his wellbeing, Isaac began to delve deeper into the world of frequencies. Astonished by his research and education, and his own healing experience using frequencies, he felt compelled to share his experience with the world.

“Anyone serious about any scientific field like physics, mathematics, and medicine will tell you that you need to know the fundamental principles.

“Future medicine will be the medicine of frequencies.” Albert Einstein

HEAL IN A REAL WAY

You need to know the source of the problem if you are going to find the solution. Frequencies, we are finding, are at the heart of all science and healing. Everything is vibrating at an electronic frequency and if you know how to create a symphony of healing frequencies for the mind and body you can begin to heal in a real way."

Nikola Tesla famously said: "If you want to find the secrets of the universe, think in terms of energy, frequency and vibration."

After discovering the power of frequencies Isaac started to assemble a scientific research team and lab to create NexQuest Life Sciences. "Our mission is to discover, create and commercialize healing frequencies for the world."

Those moments of balance that we create for ourselves where we feel an undeniable sense of calmness, relaxation or focus, NexQuest explains, is actually the result of changing the frequency of our bio-magnetic field.

Simply put, when a person is in a calm state or even asleep, their bio-magnetic field resonates at different frequencies compared to when they are wide awake and moving around.

This is reflected in the electrical activity of the brain and heart. So that feeling of rejuvenation that you feel after a 5-minute walk getting a breath of fresh air is not all in your mind, its scientifically proven.

NexQuest Life Sciences have developed a proprietary resonance technology called Natural Frequency Technology® that captures unique frequencies associated with different states of being such as Sleep, Balance, and Energy.

They then transfer these frequencies onto a stylish circular disc, which when worn on or near the skin, the body's own bio-magnetic field harmonizes with the frequencies, promoting good sleep, creating a feeling of balance or feeling more energized.

THE REASONS ARE CLEAR

We are convinced it goes without saying, that we could all use a better night's sleep, a boost of energy throughout the day or simply more balance in our lives and NexQuest have found a way to incorporate all of this without us having to squeeze in time for yet another viral social media influencer ritual. Just give us something that works, something easy and something proven.

NexQuest has scientific research confirming the action of their products and how the body responds to natural frequencies. Their products have beneficial effects as proven with randomized double-blind placebo-controlled crossover trials (the 'gold standard' in studies on humans) of their sleep bracelet conducted by Heather Hausenblas, Ph.D., Associate Dean, School of Applied Health Sciences and Professor, Kinesiology at Jacksonville University. Each product designed is a special combination of frequencies that influence very specific needs like sleep, energy, stress and more. Their studies reported statistically significant improvements in mood, perceived stress, anxiety, and sleep quality.

Quote: Dr. Hasenblas PHD.

“The Sleep Bracelet is a simple, well-tolerated, noninvasive, and all-natural intervention that people can easily use to improve their sleep quality resulting in improved mood, productivity, anxiety, and stress levels during the day. In other words, when people wore the Sleep Bracelet they slept better (sleep quality and quantity improved) and this resulted in improved mood, less stress, and anxiety, and increased productivity during the day.”

With celebrities already wearing NexQuest products such as actor Orlando Bloom and Olympic Gold Medallist Christian Taylor sporting NexQuest's frequency bracelet, we can already see that the frequency revolution has begun and is showing no signs of slowing down any time soon.

ICONS SHINE WITH OMEGA IN MILAN

ICONS SHINE WITH OMEGA

OMEGA's latest Speedmaster 38mm watches shone with their own light at a star-filled launch in Europe's style capital.

Inspired by the Italian city's well-dressed reputation, OMEGA themed the event around the fashion runway, creating its own Speedmaster showcase in the heart of the Milan for the exclusive reveal.

Launched to extend the choice of models in the already impressive core collection, OMEGA's newest Speedmaster 38 mm watches are truly dazzling. Each has a sparkling bezel paved with 52 diamonds, a polished crown set with a diamond, and three diamond-ringed subdials.

The impressive line-up of guests included brand ambassadors Naomie Harris and Alessandra Ambrosio, friends of the brand Hero Fiennes-Tiffin, Alisha Boe, and Jonathan Bailey and French actor Niels Schneider.

Representing the host country were Stefano Accorsi, Miriam Leone, Marco Mengoni, and OMEGA Italian athletes Dorothea Wierer, Federica Pellegrini, Thomas Ceccon, and Paralympic athlete Bebe Vio.

OMEGA's Milan event also included an impressive set by singer songwriter Tamera, who performed songs from her EP "Lost in Translation".

DAMAD YACHTS

LUXURY ON AQUA

Damad Yachts offers an extraordinary blend of style, comfort, and craftsmanship in luxury yacht charters. Founded by seasoned professionals David and Jorge, the company is dedicated to excellence, overseeing every aspect of their fleet to ensure the highest standards. With a focus on transparency and personalised service, Damad Yachts delivers an unmatched yachting experience for discerning clientele.

With an exceptional fleet including The Hanstaiger X1, a revolutionary trimaran, this yacht sets new benchmarks in maritime innovation. Spacious design, luxury interiors, and advanced features—like touch-button sailing and silent cruising—A symbol of sophistication and seamless adventure.

With world-class crews and tailored itineraries, they go beyond providing yachts—they craft unforgettable journeys. Damad Yachts turn every voyage into a masterpiece of indulgence on the open seas.

THE CRUCIAL *Role of* WEALTH GENERATION

In a world shaped by economic dynamics, the significance of wealth generation cannot be overstated. Beyond the allure of opulence, the process of accumulating wealth holds profound implications for individuals and societies alike. It serves as the catalyst for progress, fostering innovation, improving living standards, and enabling opportunities that ripple through communities. This article explores the multifaceted importance of wealth generation and why it remains a cornerstone for societal development.

1. Economic Growth and Innovation:

At its core, wealth generation propels economic growth. Individuals and businesses that actively participate in wealth creation stimulate innovation and contribute to the expansion of industries. A robust economy, driven by wealth creation, becomes a hotbed for technological advancements, creating a positive feedback loop of progress.

2. Improved Living Standards:

Wealth generation translates into an enhanced quality of life for individuals. As people accumulate wealth, they gain access to better healthcare, education, and housing. This not only benefits the wealth generators but also creates a more prosperous and healthier society as a whole.

SOCIAL IMPACT

FINANCIAL FREEDOM

3. Job Creation and Entrepreneurship:
Entrepreneurs play a pivotal role in wealth generation by identifying opportunities and creating value. Successful entrepreneurs not only accumulate wealth for themselves but also generate employment opportunities for others. Job creation, in turn, leads to a more stable and equitable society.

4. Philanthropy and Social Impact:
Wealthy individuals often engage in philanthropic endeavors, channeling their resources towards charitable causes and social impact initiatives. The ability to make a positive difference in areas such as education, healthcare, and poverty alleviation is heightened through the accumulation of wealth.

5. Retirement Security and Financial Freedom:

Wealth generation provides individuals with a sense of financial security, particularly in their later years. Accumulated wealth can fund retirement, ensuring a comfortable and stress-free life after years of hard work. Financial freedom allows individuals to pursue their passions and contribute to society in meaningful ways.

6. National Development:

On a broader scale, wealth generation contributes to national development. Countries with thriving economies built on the principles of wealth creation experience improved infrastructure, education systems, and overall societal well-being. The wealth generated becomes a driving force behind a nation's progress.

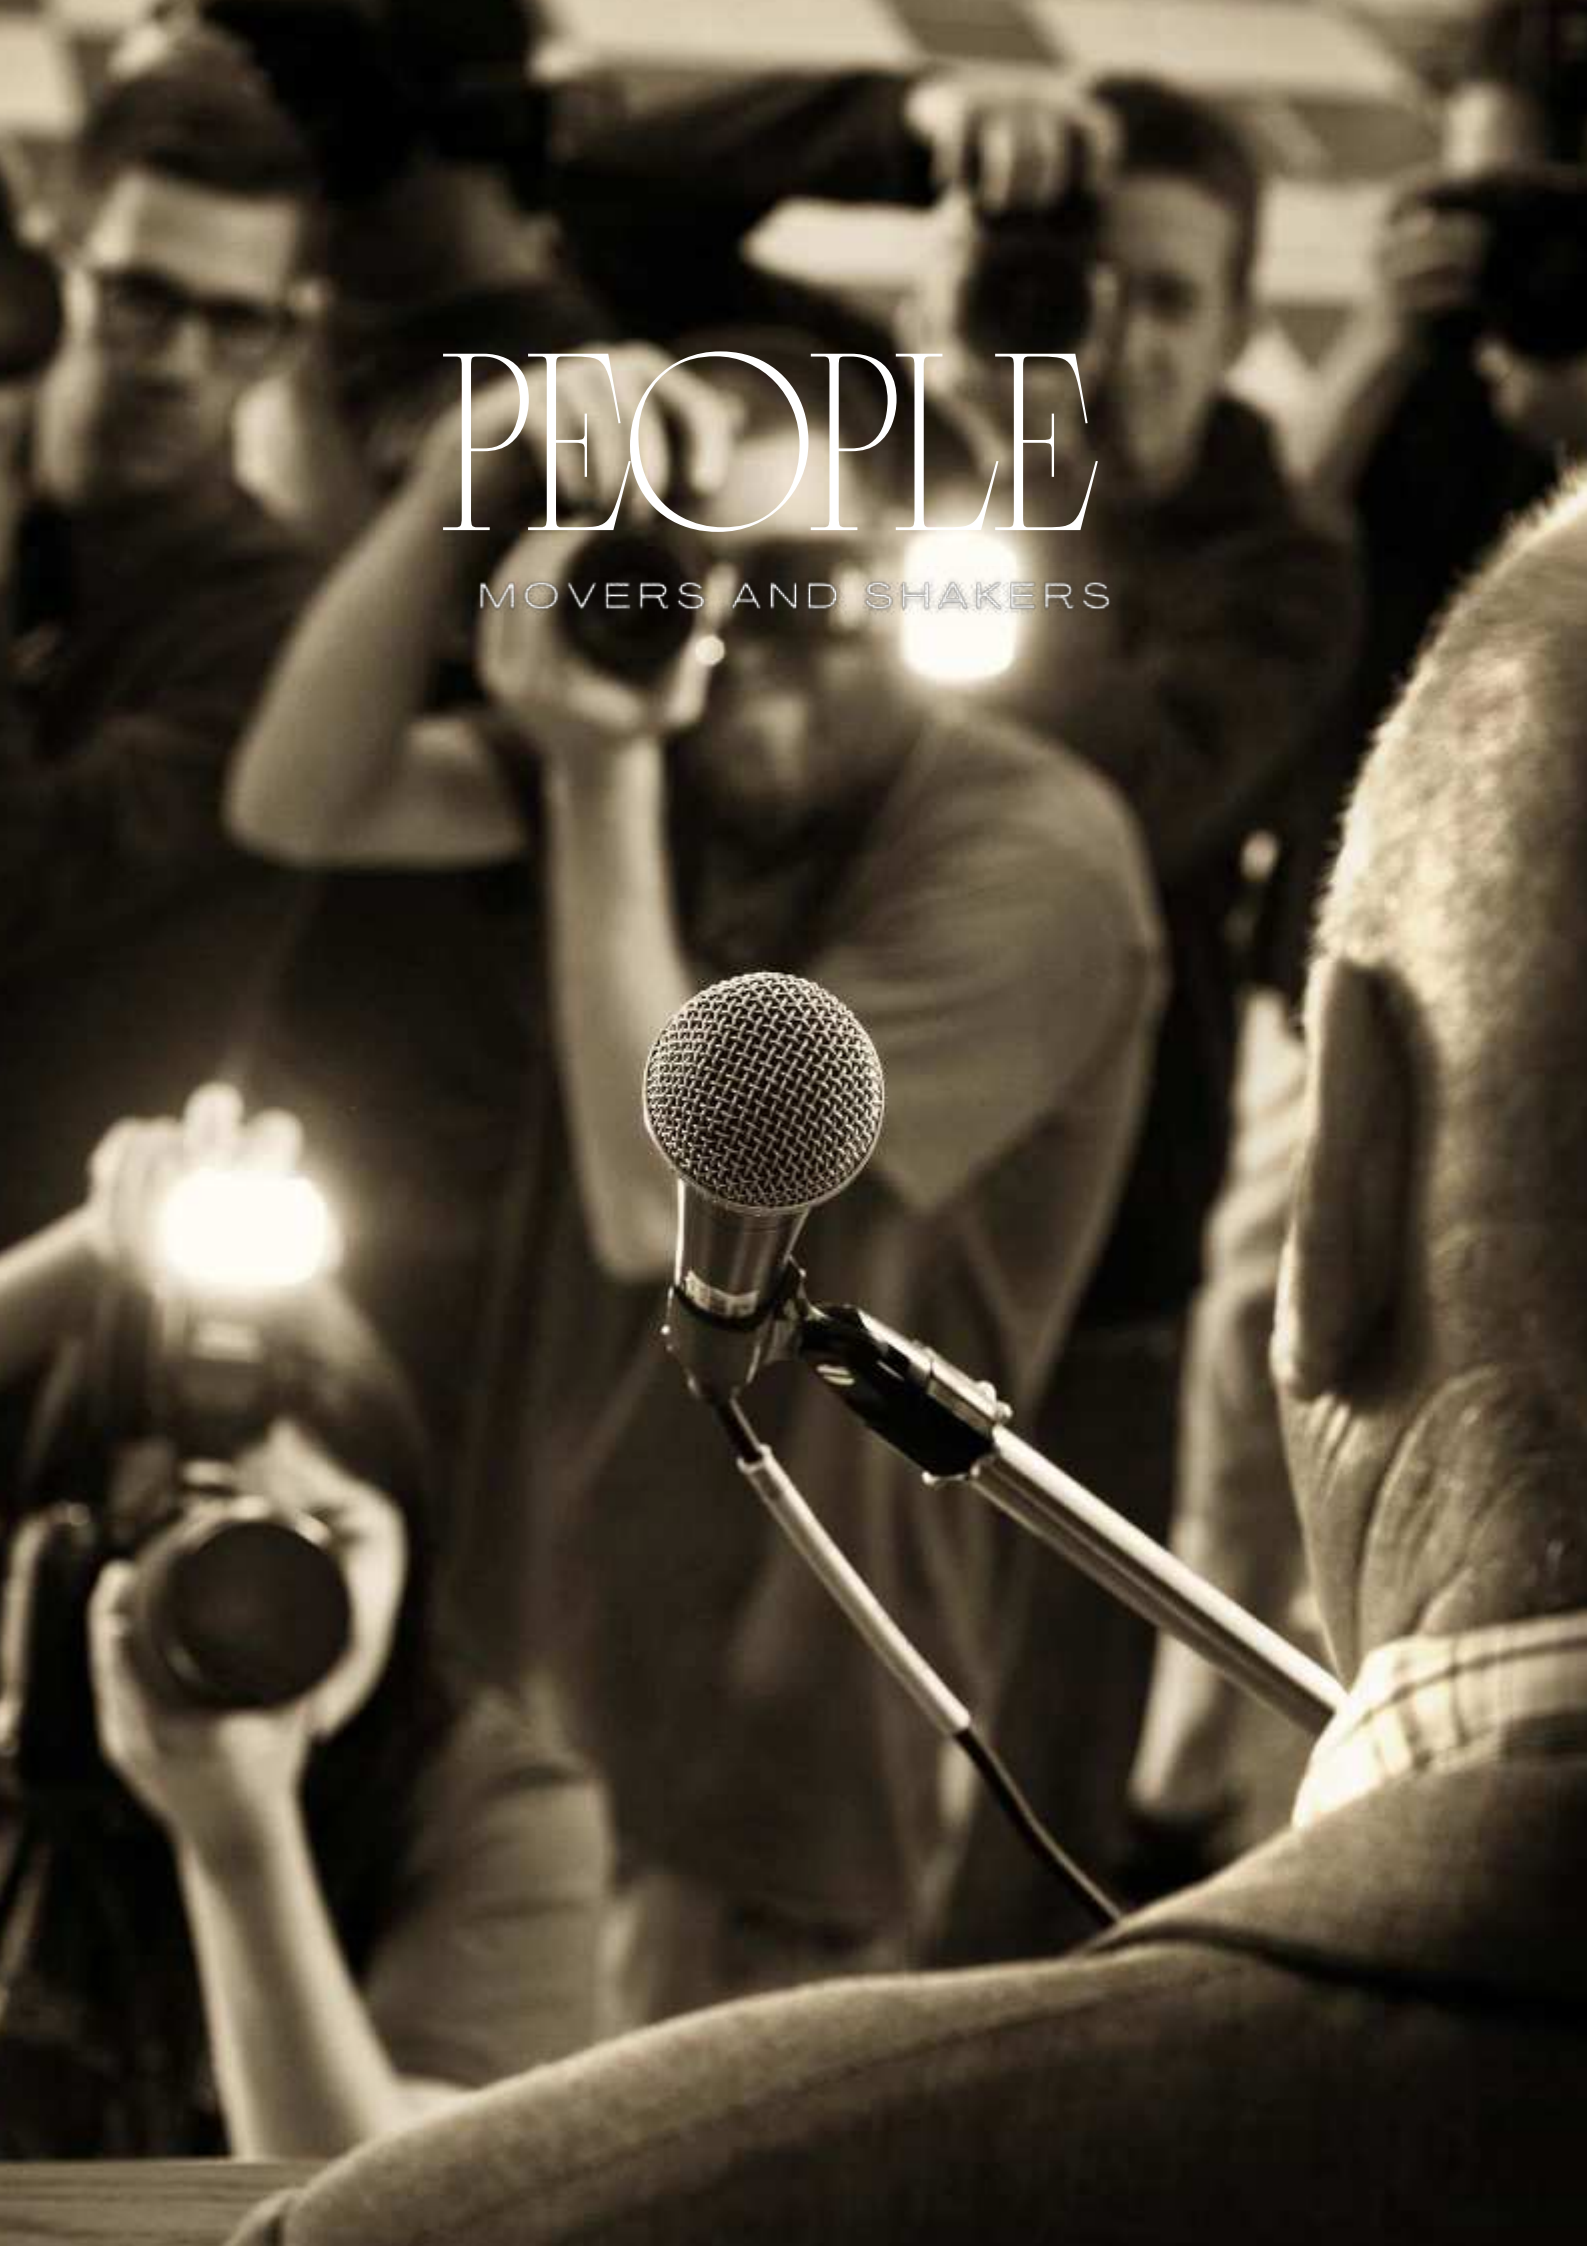

next Generation

In conclusion, the importance of wealth generation extends far beyond material accumulation. It is a force that fuels progress, drives innovation, and empowers individuals to lead fulfilling lives. Embracing a culture that values and supports wealth creation is essential for building resilient, prosperous societies that can adapt and thrive in an ever-changing world.

CHIDI AJUFO

From Lagos to Los Angeles, Hollywood's Rising Star

BREAKING STEREOTYPES

From Sport to Stardom – An Exclusive Interview with Joseph Farodoye.

Joseph Farodoye: Let's start from the beginning. Your journey to Hollywood isn't the typical story. Can you tell us a bit about how it all began?

Chidi Ajufo: Sure! I always say my career started in 2014, even though my first foray into entertainment was around 2011. At that time, I was transitioning from being an athlete to finding something else because of injuries – my body was taking a beating. Thankfully, I was in Los Angeles, the entertainment capital, and got bitten by the acting bug. I began with sports commercials for brands like Nike and Foot Locker. I even doubled as LeBron James' stunt double in a few commercials.

Joseph Farodoye: Hold on, LeBron James' stunt double? That's impressive! How did that come about?

Chidi Ajufo: (Laughs) It's a funny story. They often need someone who looks like the main actor or athlete, and people always said I looked like LeBron. We're the same height, too, so it made sense. I doubled for him in a Kia commercial and a Beats by Dre ad. Anytime you don't see his face, it's probably me!
